

DATE 3<sup>rd</sup> April 2023

EXP. No. ....

2. Working with message box and write line

### Message Box

- First of all we open the uipath studio then we go to the process option and a pop out will come & name the process.
- Then we go to the new option and click the Sequence and name it.
- From the activities, search the message box and drag it on the Sequence.
- The message box output will run on it.

## • Write Line

First of all open the Mpath Studio then we go to the process option and a pop out will come and here the process.

Then we go to new option and click the sequence and remove from the activities, search the write line and drop it on the sequence then output of write line forms an output panel of Mpath Studio.
