4. Working with Variables (Arithmetic operations)
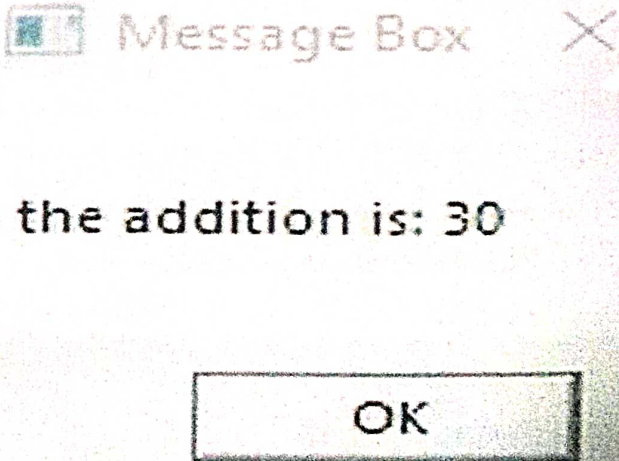

Addition :

→ We create sequence and go to assign in this way we also create Variables But in the case, we use input dialog and declere the Variable

→ We get the Output on main desktop.

the addition is: 30

OK

Subtraction :

→ We create sequence first then we go to the input dialog and declere the Variables with help of Constant control and K

→ The integer (marks) in integer type and name should be in String datatype

variables

2nd variable
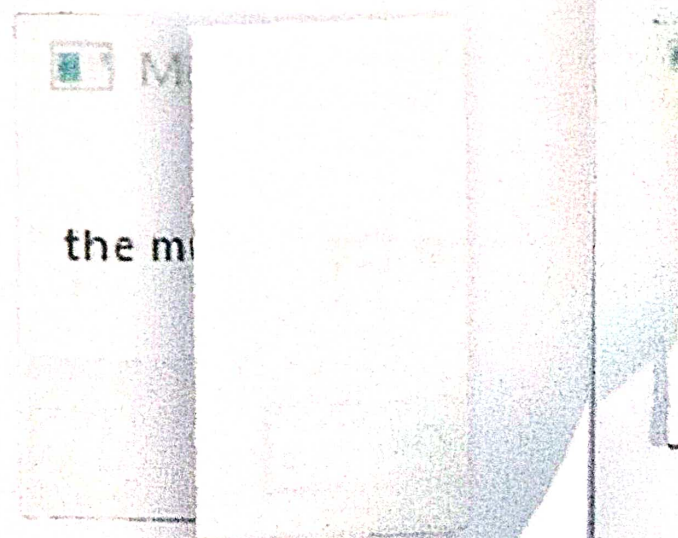

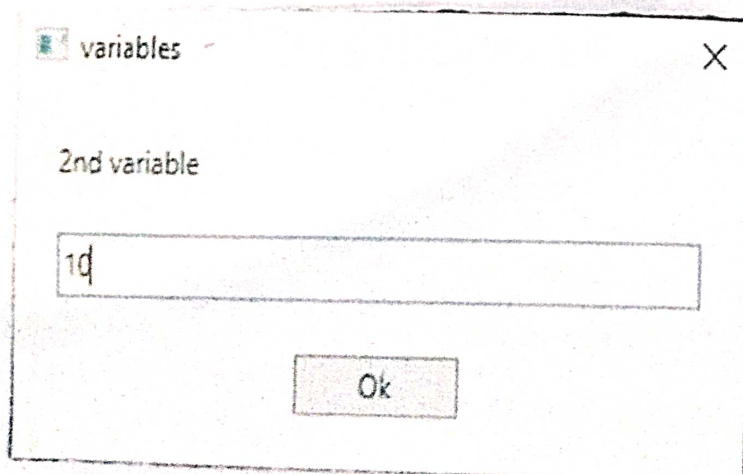

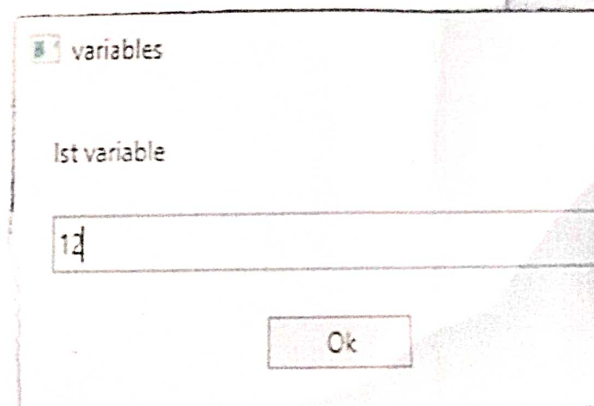

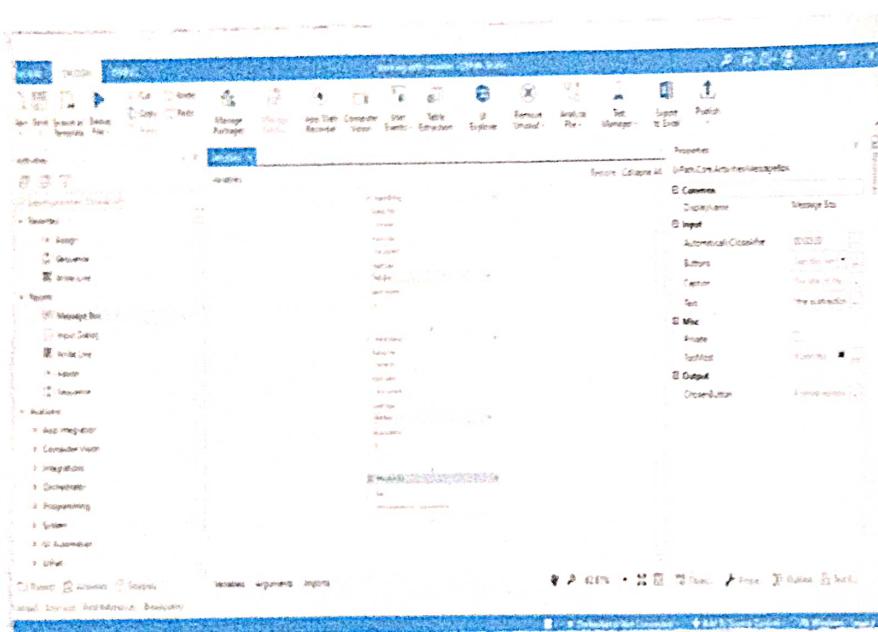

```
15
```

Ok

Message Box

the subtraction is: 5

OK

Multiplication

→ We create sequence and go to the input dialog and declare the variables.

→ The output is displayed on main dekstop.

Division

→ We create sequence and get input dialog and declare varia-
ble.

→ output is declared on main dekstop.

variables

Ist variable

```
24
```

Ok

variables   ×

2nd variable

```
4
```

Ok

Message Box   ×

the division is: 12

OK
